Preface

The Job Accommodation Network (JAN) is funded by a contract with the Office of Disability Employment Policy, U.S. Department of Labor. JAN makes documents available with the understanding that the information be used solely for educational purposes. The information is not intended to be legal or medical advice. If legal or medical advice is needed, appropriate legal or medical services should be contacted.

JAN does not endorse or recommend any products or services mentioned in this publication. Although every effort is made to update resources, JAN encourages contacting product manufacturers/vendors and service providers directly to ensure that they meet the intended purposes. This guarantees that the most up-to-date information is obtained.

The following document is not copyrighted and reproduction is encouraged. Section 105 of the Copyright Law provides that no copyright protection is available for works created by the U.S. Government. Therefore, all works created by JAN fall under this provision. While individuals may use such work with impunity, individuals may not claim copyright in the original government work, only in the original material added. Individuals may access the full text of the law from the U.S. Copyright Office https://www.loc.gov/copyright. Please note that specific information cited by JAN may be copyrighted from other sources. Citing secondary sources from a JAN publication may violate another organization's or individual's copyright. Permission must be obtained from these sources on a case-by-case basis. When using JAN materials, JAN asks that the materials not be reproduced for profit, that the tone and substance of the information are not altered, and that proper credit is given to JAN as the source of the information. For further information regarding this or any other document provided by JAN, please contact JAN.

Updated 01/24/2019.
JAN'S Accommodation and Compliance Series

Introduction

JAN's Accommodation and Compliance Series is designed to help employers determine effective accommodations and comply with Title I of the Americans with Disabilities Act (ADA). Each publication in the series addresses a specific medical condition and provides information about the condition, ADA information, accommodation ideas, and resources for additional information.

The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee's individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail.

For information on assistive technology and other accommodation ideas, visit JAN's Searchable Online Accommodation Resource (SOAR) at https://askjan.org/soar.

Information about Drug Addiction

Drug addiction is a chronic, relapsing, and treatable disease. Addiction begins with a conscious choice to use drugs, but addiction is not just "a lot of drug use." Recent scientific research provides overwhelming evidence that not only do drugs interfere with normal brain functioning creating powerful feelings of pleasure, but they also have long-term effects on brain metabolism and activity. At some point, changes occur in the brain that can turn drug abuse into addiction. Those addicted to drugs suffer from a compulsive drug craving and usage and cannot quit by themselves.

Job accommodations may include the use of paid or unpaid leave for inpatient medical treatment or flexible scheduling for counseling or to attend support meetings. When, as a part of a job, an individual is exposed to drugs in the workplace (e.g., hospitals, pharmacies), an employer may need to implement additional workplace supports, provide extra supervision, or reassign an individual to a position that does not involve exposure to drugs. JAN's Effective Accommodation Practices (EAP) Series: Executive Functioning Deficits is a publication detailing accommodations for individuals with limitations related to executive functioning. These ideas may be helpful in determining accommodations.

How can you tell if an employee is addicted to drugs?

The following are some of the behavioral characteristics that may occur with drug addiction. Note that these behavioral characteristics do not always indicate drug addiction, but may warrant further investigation.
- Absences without notification and an excessive use of sick days
- Frequent disappearances from the work site, long unexplained absences, improbable excuses
- Unreliability in keeping appointments and meeting deadlines
- Work performance that alternates between periods of high and low productivity
- Mistakes made due to inattention, poor judgment, and bad decisions
- Confusion, memory loss, and difficulty concentrating or recalling details and instructions
- Ordinary tasks require greater effort and consume more time
- Interpersonal relations with coworkers suffer
- Rarely admits errors or accepts blame for errors or oversights
- Progressive deterioration in personal appearance and hygiene
- Wearing long sleeves when inappropriate
- A personality change that includes mood swings, anxiety, depression, lack of impulse control, suicidal thoughts or gestures
- Increasing personal and professional isolation

**Can drug addiction be treated?**

Yes. A variety of approaches are used in treatment programs to help patients deal with cravings and possibly avoid drug relapse. Through treatment that is tailored to individual needs, individuals can learn to control their condition. There are several types of drug abuse treatment programs. Short-term methods last less than six months and include residential therapy, medication therapy, and drug-free outpatient therapy. Longer term treatment may include, for example, methadone maintenance outpatient treatment for opiate addicts and residential therapeutic community treatment.

**Drug Addiction and the Americans with Disabilities Act**

The ADA does not contain a list of medical conditions that constitute disabilities. Instead, the ADA has a general definition of disability that each person must meet. A person has a disability if he/she has a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment, or is regarded as having an impairment. For more information about how to determine whether a person has a disability under the ADA, see [How to Determine Whether a Person Has a Disability under the Americans with Disabilities Act Amendments Act (ADAAA)](https://www.dol.gov/agencies/oa/regs/document/ADAAA-DOL.pdf).
Accommodating Employees with Drug Addiction

People with drug addiction may develop some of the limitations discussed below, but seldom develop all of them. Also, the degree of limitation will vary among individuals. Be aware that not all people who are addicted to drugs will need accommodations to perform their jobs and many others may only need a few accommodations. The following is only a sample of the possibilities available. Numerous other accommodation solutions may exist.

Questions to Consider:

1. What limitations is the employee experiencing?
2. How do these limitations affect the employee and the employee’s job performance?
3. What specific job tasks are problematic as a result of these limitations?
4. What accommodations are available to reduce or eliminate these problems? Are all possible resources being used to determine possible accommodations?
5. Has the employee been consulted regarding possible accommodations?
6. Once accommodations are in place, would it be useful to meet with the employee to evaluate the effectiveness of the accommodations and to determine whether additional accommodations are needed?
7. Do supervisory personnel and employees need training?

Accommodation Ideas:

Limitations

Attentiveness/Concentration

- Alternative Lighting
- Applications (apps)
- Apps for Memory
- Behavior Modification Techniques
- Cubicle Doors, Shields, and Shades
- Electronic Organizers
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Full Spectrum or Natural Lighting Products
- Job Coaches
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Noise Canceling Headsets
- Sound Absorption and Sound Proof Panels
- Task Separation
- Telework, Work from Home, Working Remotely
- Timers and Watches
- Uninterrupted "Off" Work Time
- Verbal Cues
- Wall Calendars and Planners
- Worksite Redesign / Modified Workspace
- Written Instructions

Decreased Stamina/Fatigue
- Job Restructuring
- Periodic Rest Breaks
- Telework, Work from Home, Working Remotely
- Worksite Redesign / Modified Workspace

Executive Functioning Deficits
- Apps for Concentration
- Checklists
- Color Coded System
- Cubicle Doors, Shields, and Shades
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Form Generating Software
- Job Coaches
- Job Restructuring
- Marginal Functions
• Modified Break Schedule
• Noise Canceling Headsets
• Recorded Directives, Messages, Materials
• Sound Absorption and Sound Proof Panels
• Speech Recognition Software
• Timers and Watches
• Wall Calendars and Planners
• Written Instructions

Non-compliant Behavior
• Apps for Miscellaneous Mental Health / Control of Anger & Emotions
• Behavior Modification Techniques
• Counseling/Therapy
• Cubicle Doors, Shields, and Shades
• Disability Awareness/Etiquette Training
• Employee Assistance Program
• Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
• Flexible Schedule
• Habit Monitoring
• Job Restructuring
• Noise Canceling Headsets
• On-site Mentoring
• Periodic Rest Breaks
• Reminders
• Supervisory Methods
• Support Animal
• Support Person
• Telework, Work from Home, Working Remotely
• Training Modifications
• Worksite Redesign / Modified Workspace
• Written Instructions
Stress Intolerance

- Apps for Anxiety and Stress
- Behavior Modification Techniques
- Counseling/Therapy
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Supervisory Methods
- Support Animal
- Support Person

Work-Related Functions

Stress

- Apps for Anxiety and Stress
- Behavior Modification Techniques
- Counseling/Therapy
- Flexible Schedule
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Monitor Mirrors
- On-site Mentoring
- Service Animal
- Simulated Skylights and Windows
- Supervisory Methods
- Support Animal
- Support Person
- Telework, Work from Home, Working Remotely
• Uninterrupted Work Time

Use Cognitive Function
• Additional Training Time / Training Refreshers
• Aide/Assistant/Attendant
• Color Coded System
• Counting/Measuring Aids
• Electronic Dictionaries
• Electronic Organizers
• Extra Time
• Job Coaches
• Line Guides
• Marginal Functions
• Modified Break Schedule
• On-site Mentoring
• Reassignment
• Reminders
• Service Animal
• Support Person
• Training Modifications
• Uninterrupted Work Time
Situations and Solutions:

A production worker in recovery from substance abuse needed to attend counseling that was only available in the evenings. His employer excused him from overtime on the days he attended counseling.

A nurse with drug addiction was restricted from dispensing medication after she was caught using illegal drugs. Her employer had a policy allowing employees to participate in drug rehabilitation and return to work with a last chance agreement. When the nurse returned to work after rehabilitation, she was reassigned to a job that did not require her to dispense medication and given periodic drug tests.

A call center employee with a history of drug addiction was having difficulty dealing with stress, especially face-to-face discussions with her supervisor about her job performance. Her supervisor agreed to change her management style, giving performance information in writing.

A substance abuse counselor with a history of drug addiction was having difficulty working with clients while dealing with family problems. Her employer allowed him to take leave time to deal with his family problems.

Products

There are numerous products that can be used to accommodate people with limitations. JAN’s Searchable Online Accommodation Resource at https://askjan.org/soar is designed to let users explore various accommodation options. Many product vendor lists are accessible through this system; however, JAN provides these lists and many more that are not available on the Web site upon request. Contact JAN directly if you have specific accommodation situations, are looking for products, need vendor information, or are seeking a referral.

The Research Institute on Addictions (RIA) is a national leader in the study of substance use and abuse, addiction and treatment.
Start Your Recovery
https://startyourrecovery.org/

Our goal is to offer people a single source of relatable, reliable information at any stage of their recovery journey.

We work with leading experts in effectively treating substance use issues to offer people a single source of relatable, reliable information at any stage of their recovery journey.

StartYourRecovery.org provides helpful information for people who are dealing with substance use issues — and their family members, friends, and co-workers, too. We know that there is no one-size-fits-all solution to the challenges faced by those who misuse alcohol, prescription or illegal drugs, or other substances, and we aim to break through the clutter to help people at any stage of recovery.

Our goal is to offer people who are dealing with substance use issues a single source of reputable, objective information about signs, symptoms, conditions, treatment options, and resources — presented in a user-friendly format and in language that’s easy to understand. First we asked: “Why doesn’t someone offer access to these resources in one place?” Then we asked: “Why don’t we?”
