Preface

The Job Accommodation Network (JAN) is funded by a grant from the Office of Disability Employment Policy, U.S. Department of Labor. JAN makes documents available with the understanding that the information be used solely for educational purposes. The information is not intended to be legal or medical advice. If legal or medical advice is needed, appropriate legal or medical services should be contacted.

JAN does not endorse or recommend any products or services mentioned in this publication. Although every effort is made to update resources, JAN encourages contacting product manufacturers/vendors and service providers directly to ensure that they meet the intended purposes. This guarantees that the most up-to-date information is obtained.

The following document is not copyrighted and reproduction is encouraged. Section 105 of the Copyright Law provides that no copyright protection is available for works created by the U.S. Government. Therefore, all works created by JAN fall under this provision. While individuals may use such work with impunity, individuals may not claim copyright in the original government work, only in the original material added. Individuals may access the full text of the law from the U.S. Copyright Office https://www.loc.gov/copyright. Please note that specific information cited by JAN may be copyrighted from other sources. Citing secondary sources from a JAN publication may violate another organization's or individual's copyright. Permission must be obtained from these sources on a case-by-case basis. When using JAN materials, JAN asks that the materials not be reproduced for profit, that the tone and substance of the information are not altered, and that proper credit is given to JAN as the source of the information. For further information regarding this or any other document provided by JAN, please contact JAN.

Updated 09/12/2022.
JAN’S Accommodation and Compliance Series

Introduction

JAN’s Accommodation and Compliance Series is designed to help employers determine effective accommodations and comply with Title I of the Americans with Disabilities Act (ADA). Each publication in the series addresses a specific medical condition and provides information about the condition, ADA information, accommodation ideas, and resources for additional information.

The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee’s individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail.

For information on assistive technology and other accommodation ideas, visit JAN’s Searchable Online Accommodation Resource (SOAR) at https://AskJAN.org/soar.

Information about Autism Spectrum Disorders

Autism spectrum disorder (ASD) is a neurodevelopmental disorder that is characterized by persistent deficits in social communication and social interaction across multiple contexts, including deficits in social reciprocity, nonverbal communicative behaviors used for social interaction, and skills in developing, maintaining, and understanding relationships. For the diagnosis, the presence of restricted, repetitive patterns of behavior, interests, or activities is required.

JAN's Accommodation Solutions: Executive Functioning Deficits is a publication detailing accommodations for individuals with limitations related to executive functioning. These ideas may be helpful in determining accommodations.

Autism Spectrum Disorders and the Americans with Disabilities Act

The ADA does not contain a list of medical conditions that constitute disabilities. Instead, the ADA has a general definition of disability that each person must meet. A person has a disability if he/she has a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment, or is regarded as having an impairment. For more information about how to determine whether a person has a disability under the ADA, see How to Determine Whether a Person Has a Disability under the Americans with Disabilities Act Amendments Act (ADAAA).
Accommodating Employees with Autism Spectrum Disorders

People with ASD may develop some of the limitations discussed below, but seldom develop all of them. Also, the degree of limitation will vary among individuals. Be aware that not all people with ASD will need accommodations to perform their jobs and many others may only need a few accommodations. The following is only a sample of the possibilities available. Numerous other accommodation solutions may exist.

Questions to Consider:

1. What limitations is the employee experiencing?
2. How do these limitations affect the employee and the employee’s job performance?
3. What specific job tasks are problematic as a result of these limitations?
4. What accommodations are available to reduce or eliminate these problems? Are all possible resources being used to determine possible accommodations?
5. Once accommodations are in place, would it be useful to meet with the employee to evaluate the effectiveness of the accommodations and to determine whether additional accommodations are needed?
6. Do supervisory personnel and employees need training?

Accommodation Ideas:

Limitations

Attentiveness/Concentration

• Products

  • Alternative Lighting
  • Applications (apps)
  • Apps for Concentration
  • Cubicle Doors, Shields, and Shades
  • Desk Organizers
  • Desk Pedal Exercisers

• Service Animal
• Simulated Skylights and Windows
• Strobe Lights
• Supervisory Methods
• Support Animal
• Support Person
• Telework, Work from Home, Working Remotely
• Uninterrupted Work Time
Situations and Solutions:

An applicant with autism spectrum disorder applied for a research position with a chemical company. He has a verbal communication deficit, though can communicate through handwriting and by e-mail. The employer wanted to provide accommodations during the first stage interview, which involved answering questions from a three-person search committee. JAN suggested providing the questions in advance and allowing the applicant to furnish written responses during the interview.

An employee with autism spectrum disorder works for a large marketing firm. Though knowledgeable in her field, she had difficulty participating in work activities with her team. JAN suggested job restructuring, which allowed her to work independently while providing information to her team electronically. This gave the employee the social distance she needed to be comfortable, yet also provided the team with information needed to move forward with marketing campaigns.

A scientist with autism spectrum disorder was able to speak at times, but also experienced episodes when she found it difficult to speak and needed to use a speech device or speech generating app. She was preparing to present her research at a conference. She pre-recorded audio to go with her slides and brought a tablet with a speech generating app with her in case she needed it during the question and answer portion of her presentation.

A new hire at a fast food restaurant has autism spectrum disorder. He completed his new job tasks quickly and efficiently but then remained idle until someone told him the next task to perform. The manager complained that the employee "just stands around" and "looks bored." JAN suggested the use of a job coach to help learn the job and how to stay occupied during down time. JAN also suggested using a pocket-sized flowchart of work tasks that can be done when the employee is at a standstill.

A professor with autism spectrum disorder had difficulty keeping daily office hours and experienced anxiety because the timing of students' consultations was unpredictable. JAN suggested modifying the schedule as an accommodation, for example the professor could reduce the number of days he has office hours, but have more office hours on those days. JAN also suggested adjusting the method by which students obtain appointments, asking students to schedule at least one day in advance and when possible, allow the professor to conduct consultations electronically, by phone, or by instant messenger. In addition, JAN suggested documenting each student consultation to ease the professor's anxiety about the meeting and to refresh his memory about previous meetings with the student.
Products

There are numerous products that can be used to accommodate people with limitations. JAN's Searchable Online Accommodation Resource at https://AskJAN.org/soar is designed to let users explore various accommodation options. Many product vendor lists are accessible through this system; however, JAN provides these lists and many more that are not available on the Web site upon request. Contact JAN directly if you have specific accommodation situations, are looking for products, need vendor information, or are seeking a referral.

National Resource center for health information about hearing, balance, smell, taste, voice, speech, and language for health professionals, patients, industry, and the public.
The Online Asperger Syndrome Information and Support (OASIS) center has joined with MAAP Services for Autism and Asperger Syndrome to create a single resource for families, individuals, and medical professionals who deal with the challenges of Asperger Syndrome, Autism, and Pervasive Developmental Disorder/Not Otherwise Specified (PDD/NOS).

Pediatric Brain Foundation's Mission is Three-fold:

- Expedite scientific research to find treatments and cures for the more than 14 million children living with some form of neurological disorder
- Provide families and health care professionals with up-to-date information and resources on the latest discoveries in pediatric neurology
- Educate the public and public officials on the critical importance of funding pediatric neurological research

Remedy's Health Communities
http://www.healthcommunities.com
Remedy Health Media is America’s fastest growing health information and technology company. We are a leading provider of clinical resources and wellness tools that help millions of patients and caregivers live healthier, more fulfilled lives.

Our mission is to empower patients and caregivers with the information and applications needed to efficiently navigate the healthcare landscape and as a result, to permit better health outcomes through use of our products and services.

**The Arc**
