Preface

The Job Accommodation Network (JAN) is funded by a grant from the Office of Disability Employment Policy, U.S. Department of Labor. JAN makes documents available with the understanding that the information be used solely for educational purposes. The information is not intended to be legal or medical advice. If legal or medical advice is needed, appropriate legal or medical services should be contacted.

JAN does not endorse or recommend any products or services mentioned in this publication. Although every effort is made to update resources, JAN encourages contacting product manufacturers/vendors and service providers directly to ensure that they meet the intended purposes. This guarantees that the most up-to-date information is obtained.

The following document is not copyrighted and reproduction is encouraged. Section 105 of the Copyright Law provides that no copyright protection is available for works created by the U.S. Government. Therefore, all works created by JAN fall under this provision. While individuals may use such work with impunity, individuals may not claim copyright in the original government work, only in the original material added. Individuals may access the full text of the law from the U.S. Copyright Office https://www.loc.gov/copyright. Please note that specific information cited by JAN may be copyrighted from other sources. Citing secondary sources from a JAN publication may violate another organization's or individual's copyright. Permission must be obtained from these sources on a case-by-case basis. When using JAN materials, JAN asks that the materials not be reproduced for profit, that the tone and substance of the information are not altered, and that proper credit is given to JAN as the source of the information. For further information regarding this or any other document provided by JAN, please contact JAN.

Updated 09/12/2022.
JAN’s Accommodation and Compliance Series

Introduction

JAN’s Accommodation and Compliance Series is designed to help employers determine effective accommodations and comply with Title I of the Americans with Disabilities Act (ADA). Each publication in the series addresses a specific medical condition and provides information about the condition, ADA information, accommodation ideas, and resources for additional information.

The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee’s individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail.

For information on assistive technology and other accommodation ideas, visit JAN’s Searchable Online Accommodation Resource (SOAR) at https://AskJAN.org/soar.

Information about Gastrointestinal Disorders

Gastrointestinal (GI) disorders affect millions of people of all ages - men, women, and children. Examples of GI disorders include Crohn's disease, gastroparesis, ulcerative colitis, irritable bowel syndrome, spastic colon, and diverticulitis. Symptoms of GI disorders range from very mild to debilitating. Just as symptoms may vary from person to person, so may the need for job accommodation.

Gastrointestinal Disorders and the Americans with Disabilities Act

The ADA does not contain a list of medical conditions that constitute disabilities. Instead, the ADA has a general definition of disability that each person must meet. A person has a disability if he/she has a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment, or is regarded as having an impairment. For more information about how to determine whether a person has a disability under the ADA, see How to Determine Whether a Person Has a Disability under the Americans with Disabilities Act Amendments Act (ADAAA).

Accommodating Employees with Gastrointestinal Disorders

People with gastrointestinal disorders may develop some of the limitations discussed below, but seldom develop all of them. Also, the degree of limitation will vary among individuals. Be aware that not all people with gastrointestinal disorders will need accommodations to perform their jobs and many others may only need a few
accommodations. The following is only a sample of the possibilities available. Numerous other accommodation solutions may exist.

Questions to Consider:

1. What limitations is the employee experiencing?
2. How do these limitations affect the employee and the employee’s job performance?
3. What specific job tasks are problematic as a result of these limitations?
4. What accommodations are available to reduce or eliminate these problems? Are all possible resources being used to determine possible accommodations?
5. Once accommodations are in place, would it be useful to meet with the employee to evaluate the effectiveness of the accommodations and to determine whether additional accommodations are needed?
6. Do supervisory personnel and employees need training?

Accommodation Ideas:

Limitations

Decreased Stamina/Fatigue
- Aide/Assistant/Attendant
- Ergonomic Assessments
- Ergonomic Equipment
- Job Restructuring
- Periodic Rest Breaks
- Stand-lean Stools
- Telework, Work from Home, Working Remotely
- Worksite Redesign / Modified Workspace

Effect of/Receive Medical Treatment
- Augmentative and Alternative Communication (AAC) Device
- Flexible Schedule
- Outgoing Voice Amplification - Telephone
- Personal On-Site Paging Devices
- Protective Eyewear
• Telework, Work from Home, Working Remotely
• Voice Amplification

Stress Intolerance
• Apps for Anxiety and Stress
• Behavior Modification Techniques
• Counseling/Therapy
• Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
• Flexible Schedule
• Job Restructuring
• Marginal Functions
• Modified Break Schedule
• Supervisory Methods
• Support Animal
• Support Person

Toileting/Grooming Issue
• Accessible Toilets and Toilet Seats
• Aide/Assistant/Attendant
• Flexible Schedule
• Grab Bars - Toilet Hinged Arm Support
• Modified Break Schedule
• Swing Away Grab Bars
• Telework, Work from Home, Working Remotely
• Toileting Aids
• Worksite Redesign / Modified Workspace

Work-Related Functions

Commute
• Flexible Schedule
• Ridesharing/Carpooling
• Telework, Work from Home, Working Remotely
• Transportation Assistance
• Van Conversion
• Walkers

Stress
• Apps for Anxiety and Stress
• Behavior Modification Techniques
• Counseling/Therapy
• Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
• Flexible Schedule
• Job Coaches
• Job Restructuring
• Marginal Functions
• Modified Break Schedule
• Monitor Mirrors
• Odor Control
• On-site Mentoring
• Service Animal
• Simulated Skylights and Windows
• Strobe Lights
• Supervisory Methods
• Support Animal
• Support Person
• Telework, Work from Home, Working Remotely
• Uninterrupted Work Time
Situations and Solutions:

An employee seems to have trouble interacting with members of the public. The employee mentions that performing this job duty causes him a lot of stress, and this stress makes his ulcerative colitis much more likely to flare up. The employer reviews the individual’s job duties and finds that interacting with the public is a marginal function of the individual’s job. The employer agrees to restructure the individual’s job as an accommodation so that this job duty will be reallocated to other employees, and they discuss other job duties that they can give him that would not cause this level of stress to keep the work load balanced.

An employee with fecal incontinence mentions that they have trouble making it to the restroom in time and often has accidents due to this. The employer moves the employee’s workstation as an accommodation so that the employee is as close as possible to a restroom.

During the holiday season an employer hosts an employee appreciation luncheon. An employee with gastroesophageal reflux disease (GERD) and obesity was on a restrictive diet, which included avoiding foods and drinks that triggered severe symptoms. In addition to the food typically provided for the event, the employer agreed to work with the catering company to develop additional dishes that the employee would be able to eat. This accommodation benefited others with similar sensitivities to food.

An applicant, while being toured around the workplace, notices that the employer has a cafeteria that provides employees with one meal during their meal breaks per day as a benefit of employment. The applicant mentions that she has Celiac’s disease, and therefore would need gluten-free options in order to enjoy this benefit of employment. The employer agrees to modify the menu by adding some gluten-free options as an accommodation.

A claims processor with a gastrointestinal disorder was having flare ups of his condition, which resulted in a strong odor that was affecting coworkers. He asked to work from home until he could get his condition under control. His employer granted his request.

A supervisor has noticed that one of his employees consistently takes a much longer time in the restroom and this seems to be negatively impacting his performance. When the supervisor approaches the employee regarding this, the employee discloses that he has irritable bowel syndrome and because of this disability needs to take more time to use the restroom. The employer reviews the situation and allows for a modification to the employee’s schedule as an accommodation so that the employee makes up the time that he missed due to his longer restroom breaks by extending his shift’s end time each day as needed.
A computer operator was experiencing weight loss and gastrointestinal limitations as a result of having HIV.
She was provided with an ergonomic chair with extra padding and began to change seating positions often. This prevented her from getting sores from sitting in one position for prolonged periods of time. Employee’s workstation was also moved closer to a restroom to provide her better access. Total cost to move employee to another workstation was virtually nothing.

After receiving complaints from coworkers about an employee passing very smelly gas, the employer discussed the problem with the employee.
The employee said he was aware of the problem, but did not know it was that bad. He indicated that he has a gastrointestinal disorder that had flared up recently. The employer agreed to allow the employee to telework until the employee’s condition was under control again.

**Products**

There are numerous products that can be used to accommodate people with limitations. JAN's Searchable Online Accommodation Resource at https://AskJAN.org/soar is designed to let users explore various accommodation options. Many product vendor lists are accessible through this system; however, JAN provides these lists and many more that are not available on the Web site upon request. Contact JAN directly if you have specific accommodation situations, are looking for products, need vendor information, or are seeking a referral.
