Preface

The Job Accommodation Network (JAN) is funded by a contract with the Office of Disability Employment Policy, U.S. Department of Labor. JAN makes documents available with the understanding that the information be used solely for educational purposes. The information is not intended to be legal or medical advice. If legal or medical advice is needed, appropriate legal or medical services should be contacted.

JAN does not endorse or recommend any products or services mentioned in this publication. Although every effort is made to update resources, JAN encourages contacting product manufacturers/vendors and service providers directly to ensure that they meet the intended purposes. This guarantees that the most up-to-date information is obtained.

The following document is not copyrighted and reproduction is encouraged. Section 105 of the Copyright Law provides that no copyright protection is available for works created by the U.S. Government. Therefore, all works created by JAN fall under this provision. While individuals may use such work with impunity, individuals may not claim copyright in the original government work, only in the original material added. Individuals may access the full text of the law from the U.S. Copyright Office https://www.loc.gov/copyright. Please note that specific information cited by JAN may be copyrighted from other sources. Citing secondary sources from a JAN publication may violate another organization's or individual's copyright. Permission must be obtained from these sources on a case-by-case basis. When using JAN materials, JAN asks that the materials not be reproduced for profit, that the tone and substance of the information are not altered, and that proper credit is given to JAN as the source of the information. For further information regarding this or any other document provided by JAN, please contact JAN.

Updated 08/14/2019.
JAN’S Accommodation and Compliance Series

Introduction

JAN’s Accommodation and Compliance Series is designed to help employers determine effective accommodations and comply with Title I of the Americans with Disabilities Act (ADA). Each publication in the series addresses a specific medical condition and provides information about the condition, ADA information, accommodation ideas, and resources for additional information.

The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee’s individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail.

For information on assistive technology and other accommodation ideas, visit JAN’s Searchable Online Accommodation Resource (SOAR) at https://askjan.org/soar.

Information about Reflex Sympathetic Dystrophy (RSD)

Complex regional pain syndrome (CRPS) is a condition described as a chronic pain occurring as a result of trauma to a soft tissue or bone (Type I) or nerve injury (Type II). Type I CRPS is also called reflex sympathetic dystrophy (RSD) and causalgia. A progressive disease of the nervous system, symptoms of pain and burning can affect one, two, three, or all for limbs. In extreme cases other or all parts of the body may be affected. Complications to the condition include depression, anxiety, and atrophy.

Reflex Sympathetic Dystrophy (RSD) and the Americans with Disabilities Act

The ADA does not contain a list of medical conditions that constitute disabilities. Instead, the ADA has a general definition of disability that each person must meet. A person has a disability if he/she has a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment, or is regarded as having an impairment. For more information about how to determine whether a person has a disability under the ADA, see How to Determine Whether a Person Has a Disability under the Americans with Disabilities Act Amendments Act (ADAAA).
Accommodating Employees with Reflex Sympathetic Dystrophy (RSD)

People with limitations from complex regional pain syndrome or reflex sympathetic dystrophy may develop some of the limitations discussed below, but seldom develop all of them. Also, the degree of limitation will vary among individuals. Be aware that not all people who are aging will need accommodations to perform their jobs and many others may only need a few accommodations. The following is only a sample of the possibilities available. Numerous other accommodation solutions may exist.

Questions to Consider:

1. What limitations is the employee experiencing?
2. How do these limitations affect the employee and the employee's job performance?
3. What specific job tasks are problematic as a result of these limitations?
4. What accommodations are available to reduce or eliminate these problems? Are all possible resources being used to determine possible accommodations?
5. Has the employee been consulted regarding possible accommodations?
6. Once accommodations are in place, would it be useful to meet with the employee to evaluate the effectiveness of the accommodations and to determine whether additional accommodations are needed?
7. Do supervisory personnel and employees need training?

Accommodation Ideas:

Limitations

Operating Foot Control
  • Hand Controls
  • Left-Foot Gas Pedal

Pain
  • Industrial
    • Adjustable Workstations for Industrial Settings
    • Anti-fatigue Matting
    • Anti-vibration Gloves

Practical Solutions • Workplace Success
• Anti-vibration Seats
• Anti-vibration Tool Wraps
• Carts
• Compact Material Handling
• Wearable Anti-fatigue Matting

• Office
• Adjustable Workstations for Office Settings
• Alternative Keyboards
• Alternative Mice
• Chairs with Head Support
• Ergonomic and Adjustable Office Chairs
• Ergonomic Assessments
• Ergonomic Equipment
• Forearm Supports
• Gooseneck and Other Telephone Holders
• Scribe/Notetaker
• Speech Recognition Software
• Supine Workstations
• Writing Aids

• Other
• Aide/Assistant/Attendant
• Automatic Door Openers
• Flexible Schedule
• Modified Break Schedule
• Scooters
• Service Animal
• Stand-lean Stools
• Telework, Work from Home, Working Remotely
• Worksite Redesign / Modified Workspace
• Workstation Space Heaters

Standing
- Adjustable Workstations for Industrial Settings
- Adjustable Workstations for Office Settings
- Anti-fatigue Matting
- Assist Lift Cushions
- Elevating Lift and Office Chairs
- Flexible Schedule
- Grab Bars
- Periodic Rest Breaks
- Scooters
- Stand Aids
- Stand-lean Stools
- Stand-up Wheelchairs
- Wearable Anti-fatigue Matting

Stress Intolerance
- Apps for Anxiety and Stress
- Behavior Modification Techniques
- Counseling/Therapy
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Supervisory Methods
- Support Animal
- Support Person

Use of One Hand/Arm
- Alternative Input Devices
- Alternative Keyboards
- Alternative Mice
- Articulating Keyboard Trays
• Ergonomic Equipment
• Expanded Keyboards
• Eye Controlled Alternative Computer Input Devices
• Forearm Supports
• Keyguards
• Left Hand-Dominant Keyboards
• Miniature Keyboards
• On-Screen Keyboards

- Monitor Mirrors
- On-site Mentoring
- Service Animal
- Simulated Skylights and Windows
- Supervisory Methods
- Support Animal
- Support Person
- Telework, Work from Home, Working Remotely
- Uninterrupted Work Time
Situations and Solutions:

A college coordinator had reflex sympathetic dystrophy, which made her legs swell.
The employee had to elevate her legs periodically throughout the day. The employer purchased a specialized reclining office chair with footrest. The employee was able to continue working at full production with the new chair and a laptop.

A meter reader had reflex sympathetic dystrophy causing numbness in his feet.
The condition flared in the early morning, so the employee requested a later start time as a reasonable accommodation. The employer modified his schedule which enabled the employee to work when he was feeling his best, but also permitted the job to be performed.

A graphic artist experienced depression which stemmed from reflex sympathetic dystrophy.
He was having difficulty keeping up with the production standards. The employer provided him with an alerting timer which enabled the employee to work on one task until the alarm went off then he could change tasks. This enabled the employee to maintain production requirements.

A social worker with reflex sympathetic dystrophy had limited use of one hand.
The employee was having a hard time keeping up with case documentation requirements. The employer explored alternative input devices on the JAN website and provided the employee with a one handed keyboard and speech recognition software.

An associate director of a nonprofit used a wheelchair due to reflex sympathetic dystrophy.
They had trouble with toileting needs so they requested an accommodation which included additional grab bars be installed and the door to be equipped with an automatic door assist. The employer installed these products with the aid of the state vocational rehabilitation agency.

Products

There are numerous products that can be used to accommodate people with limitations. JAN's Searchable Online Accommodation Resource at [https://askjan.org/soar](https://askjan.org/soar) is designed to let users explore various accommodation options. Many product vendor lists are accessible through this system; however, JAN provides these lists and many more that are not available on the Web site upon request. Contact JAN directly if you have specific accommodation situations, are looking for products, need vendor information, or are seeking a referral.

ACPA@theacpa.org
http://www.theacpa.org
The purpose of the American Chronic Pain Association is to facilitate peer support and education for individuals with chronic pain and their families so that these individuals may live more fully in spite of their pain.

**Arthritis Foundation**  
1330 W. Peachtree Street  
Suite 100  
Atlanta, GA 30309  
Direct: (404) 872-7100  
[http://www.arthritis.org](http://www.arthritis.org)

The Arthritis Foundation is committed to raising awareness and reducing the unacceptable impact of arthritis, a disease which must be taken as seriously as other chronic diseases because of its devastating consequences. The Arthritis Foundation is leading the way to conquer the nation’s leading cause of disability through increased education, outreach, research, advocacy and other vital programs and services.

**Institute for Chronic Pain**  
PO Box 193  
Stillwater, MN 55082  
[http://www.instituteforchronicpain.org/](http://www.instituteforchronicpain.org/)

The Institute for Chronic Pain is an educational and public policy think tank whose mission is to change the culture of how chronic pain is treated. We engage in research, development, and promotion of scientifically accurate information related to the field of chronic pain management. We do so by bringing together thought leaders from around the world to provide academic-quality information that is approachable to all stakeholders in the field, particularly, patients, their families, and society, more generally. The staff and fellows of the Institute are specialists in chronic pain management as well as healthcare policy and management.
The International Research Foundation for RSD / CRPS is a not-for-profit organization (501c3) dedicated to education and research on Reflex Sympathetic Dystrophy and Complex Regional Pain Syndrome. The primary mission of the Foundation is to establish an international research network which will help educate medical professionals and support research worldwide.

The Mayo Clinic's mission to inspire hope and contribute to health and well-being by providing the best care to every patient through integrated clinical practice, education and research.

MISSION: IMS brings together an international community of health care professionals, researchers, educators, and others to improve care and transform delivery of treatment to those suffering from soft tissue pain through the promotion and exchange of globally recognized research, education, and innovation in patient care.
