Preface

The Job Accommodation Network (JAN) is funded by a contract with the Office of Disability Employment Policy, U.S. Department of Labor. JAN makes documents available with the understanding that the information be used solely for educational purposes. The information is not intended to be legal or medical advice. If legal or medical advice is needed, appropriate legal or medical services should be contacted.

JAN does not endorse or recommend any products or services mentioned in this publication. Although every effort is made to update resources, JAN encourages contacting product manufacturers/vendors and service providers directly to ensure that they meet the intended purposes. This guarantees that the most up-to-date information is obtained.

The following document is not copyrighted and reproduction is encouraged. Section 105 of the Copyright Law provides that no copyright protection is available for works created by the U.S. Government. Therefore, all works created by JAN fall under this provision. While individuals may use such work with impunity, individuals may not claim copyright in the original government work, only in the original material added. Individuals may access the full text of the law from the U.S. Copyright Office <https://www.loc.gov/copyright>. Please note that specific information cited by JAN may be copyrighted from other sources. Citing secondary sources from a JAN publication may violate another organization's or individual's copyright. Permission must be obtained from these sources on a case-by-case basis. When using JAN materials, JAN asks that the materials not be reproduced for profit, that the tone and substance of the information are not altered, and that proper credit is given to JAN as the source of the information. For further information regarding this or any other document provided by JAN, please contact JAN.

Updated 12/01/2020.

JAN'S Accommodation and Compliance Series

Introduction

JAN's Accommodation and Compliance Series is designed to help employers determine effective accommodations and comply with Title I of the Americans with Disabilities Act (ADA). Each publication in the series addresses a specific medical condition and provides information about the condition, ADA information, accommodation ideas, and resources for additional information.

The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee's individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail.

For information on assistive technology and other accommodation ideas, visit JAN's Searchable Online Accommodation Resource (SOAR) at <https://askjan.org/soar>.

Information about Seasonal Affective Disorder (SAD)

Seasonal Affective Disorder (SAD) is a type of depression that is exacerbated by gray overcast skies and poor indoor lighting. Some common symptoms of SAD are:

- Oversleeping;
- Fatigue;
- Feeling lethargic;
- Irritability and stress intolerance; and
- Lack of interest in daily activities, sex, or social interactions.

Treatment for SAD usually involves medication combined with light therapy. Light therapy is exposure to high intensity bright lights, typically referred to as light or sun boxes. An individual spends a period of time each day exposed to this light, and treatment can last from 30 minutes to 2 hours per day. Many of these light boxes are portable and can be placed on a desk or table in the work environment.

Seasonal Affective Disorder (SAD) and the Americans with Disabilities Act

The ADA does not contain a list of medical conditions that constitute disabilities. Instead, the ADA has a general definition of disability that each person must meet. A person has a disability if he/she has a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment, or is regarded as

having an impairment. For more information about how to determine whether a person has a disability under the ADA, see [How to Determine Whether a Person Has a Disability under the Americans with Disabilities Act Amendments Act \(ADAAA\)](#).

Accommodating Employees with Seasonal Affective Disorder (SAD)

People with seasonal affective disorder may develop some of the limitations discussed below, but seldom develop all of them. Also, the degree of limitation will vary among individuals. Be aware that not all people with SAD will need accommodations to perform their jobs and many others may only need a few accommodations. The following is only a sample of the possibilities available. Numerous other accommodation solutions may exist.

Four basic light products are available to accommodate workers with SAD:

- [Light Boxes](#): These are rectangular light fixtures that have several fluorescent tubes that produce between 5,000 and 10,000 lux and come in many different sizes and styles.
- [Light Visors](#): These are head-mounted light sources that resembling tennis visors and are good choices for people who do not have sedentary jobs or need to be mobile during the day.
- [Desk Lamps](#): These resemble typical office lamps.
- [Dawn Stimulators](#): These are devices that mimic natural sunrises by gradually brightening rooms over programmed periods of time.

JAN's [Effective Accommodation Practices \(EAP\) Series: Executive Functioning Deficits](#) is a publication detailing accommodations for individuals with limitations related to executive functioning. These ideas may be helpful in determining accommodations.

Questions to Consider:

1. What limitations is the employee experiencing?
2. How do these limitations affect the employee and the employee's job performance?
3. What specific job tasks are problematic as a result of these limitations?
4. What accommodations are available to reduce or eliminate these problems? Are all possible resources being used to determine possible accommodations?
5. Has the employee been consulted regarding possible accommodations?
6. Once accommodations are in place, would it be useful to meet with the employee to evaluate the effectiveness of the accommodations and to determine whether additional accommodations are needed?
7. Do supervisory personnel and employees need training?

Accommodation Ideas:

Limitations

Attentiveness/Concentration

- Products
 - Alternative Lighting
 - Applications (apps)
 - Apps for Concentration
 - Cubicle Doors, Shields, and Shades
 - Desk Organizers
 - Desk Pedal Exercisers
 - Electronic Organizers
 - Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
 - Fidget Devices
 - Focus Enhancement
 - Full Spectrum or Natural Lighting Products
 - Noise Abatement
 - Noise Canceling Earbuds
 - Noise Canceling Headsets
 - Sound Absorption and Sound Proof Panels
 - Simulated Skylights and Windows
 - Sun Boxes and Lights
 - Sun Simulating Desk Lamps
 - Timers and Watches
 - Wall Calendars and Planners
- Services
 - Job Coaches
- Strategies
 - Color Coded System
 - Behavior Modification Techniques

- Strategies
 - Behavior Modification Techniques
 - Communicate Another Way
 - Complying with Behavior and Conduct Rules
 - Flexible Schedule
 - Instant Messaging and Texting Solutions for Businesses
 - Job Restructuring
 - Marginal Functions
 - Modified Break Schedule
 - On-site Mentoring
 - One-on-One Communication
 - Policy Modification
 - Positive Feedback

- Supervisory Feedback
- Supervisory Methods
- Support Animal
- Support Person
- Telepresence
- Telework, Work from Home, Working Remotely

Work-Related Functions

Stress

- Apps for Anxiety and Stress
- Behavior Modification Techniques
- Counseling/Therapy
- Flexible Schedule
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- On-site Mentoring
- Service Animal
- Simulated Skylights and Windows
- Supervisory Methods
- Support Animal
- Support Person
- Task Rotation
- Telework, Work from Home, Working Remotely
- Uninterrupted Work Time

Situations and Solutions:

A grocery store bagger with seasonal affective disorder (SAD) had difficulty working an early schedule due to oversleeping.

She also experienced fatigue and depression during late fall and winter months. She was accommodated with an afternoon schedule and was moved to the front of the store, which had windows that let sunlight enter her workspace.

A driver with seasonal affective disorder (SAD) who picks up and delivers clients to various appointments began to forget waiting clients as well as the routes she needed to travel in order to deliver them to the appropriate facility.

When her employer mentioned the mistakes, the driver broke down. She described her depression and anxiety with the change of seasons and how it affected her memory. The use of reminder apps, as well as those to help with directions, were discussed as possible accommodation solutions.

Due to seasonal affective disorder (SAD) an elementary teacher experienced temporary but extreme fatigue that was expected to persist for several months due to a change in medication and the onset of winter.

He was accommodated with the removal of two extra duty requirements. Job restructuring, which consisted of temporarily removing his early and late bus duties, caused no hardship to the employer and greatly reduced his expenditure of depleted energy.

Due to her limitations from seasonal affective disorder (SAD), an office worker requested to move from her current location within a sea of cubicles to an office with windows.

Because offices were provided to management only, the employer moved the employee's cubicle to the side of the "sea" where a bank of windows actually provided more natural light than any of the offices would have.

An architect in a large, busy, open office space requested a private workspace (on the sunny side of the building) to help her handle stress and emotions brought on by the open, crowded, and often noisy environment.

Her employer agreed to her requested accommodations for seasonal affective disorder (SAD), but also provided telework as an option as well as flexible scheduling for when the employee was particularly stressed while under firm deadlines.

An employee at a manufacturing site had been successfully working the second shift with seasonal affective disorder (SAD).

He experienced fatigue and difficulty with concentration due to disruption of his sleep patterns and couldn't work the early shift a new manager assigned him to. The employee was accommodated with the ability to remain on his current shift. The new manager found many employees willing to switch and work the day shift.

Products

There are numerous products that can be used to accommodate people with limitations. JAN's Searchable Online Accommodation Resource at <https://askjan.org/soar> is designed to let users explore various accommodation options. Many product vendor lists are accessible through this system; however, JAN provides these lists and many more that are not available on the Web site upon request. Contact JAN directly if you have specific accommodation situations, are looking for products, need vendor information, or are seeking a referral.
