Preface

The Job Accommodation Network (JAN) is funded by a grant from the Office of Disability Employment Policy, U.S. Department of Labor. JAN makes documents available with the understanding that the information be used solely for educational purposes. The information is not intended to be legal or medical advice. If legal or medical advice is needed, appropriate legal or medical services should be contacted.

JAN does not endorse or recommend any products or services mentioned in this publication. Although every effort is made to update resources, JAN encourages contacting product manufacturers/vendors and service providers directly to ensure that they meet the intended purposes. This guarantees that the most up-to-date information is obtained.

The following document is not copyrighted and reproduction is encouraged. Section 105 of the Copyright Law provides that no copyright protection is available for works created by the U.S. Government. Therefore, all works created by JAN fall under this provision. While individuals may use such work with impunity, individuals may not claim copyright in the original government work, only in the original material added. Individuals may access the full text of the law from the U.S. Copyright Office https://www.loc.gov/copyright. Please note that specific information cited by JAN may be copyrighted from other sources. Citing secondary sources from a JAN publication may violate another organization's or individual's copyright. Permission must be obtained from these sources on a case-by-case basis. When using JAN materials, JAN asks that the materials not be reproduced for profit, that the tone and substance of the information are not altered, and that proper credit is given to JAN as the source of the information. For further information regarding this or any other document provided by JAN, please contact JAN.

Updated 02/07/2024.
JAN’S Accommodation and Compliance Series

Introduction

JAN’s Accommodation and Compliance Series is designed to help employers determine effective accommodations and comply with Title I of the Americans with Disabilities Act (ADA). Each publication in the series addresses a specific medical condition and provides information about the condition, ADA information, accommodation ideas, and resources for additional information.

The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee’s individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail.

For information on assistive technology and other accommodation ideas, visit JAN’s Searchable Online Accommodation Resource (SOAR) at https://AskJAN.org/soar.

Information about Migraines

Migraines are recurring primary headaches that can cause severe throbbing or pulsing pain, and often come with additional symptoms such as nausea, light and noise sensitivity, weakness, and fatigue. The two most frequently discussed types of migraines in the literature are migraine with aura and migraine without aura. Migraines have no known cause, but are influenced by genetics, stress, diet, environment, medications, and more.

- Migraine with aura — less common; are accompanied by additional neurological symptoms usually related to visual disturbances
- Migraine without aura — the most common; 70-90% of those who experience migraines will not have an aura

The four phases of migraines.

- **Prodome**. This phase starts up to 24 hours before the migraine. Early signs and symptoms include food cravings, unexplained mood changes, uncontrollable yawning, fluid retention, and increased urination.
- **Aura**. If auras are present, they might include flashing or bright lights or zig-zag lines. Muscle weakness or a feeling of being touched or grabbed may occur. An aura can happen just before or during a migraine.
- **Headache**. A migraine usually starts gradually and then becomes more severe. It typically causes throbbing or pulsing pain, often on one side of the head. But sometimes a migraine can occur without a headache. Other migraine symptoms may include...
• Increased sensitivity to light, noise, and odors
• Nausea and vomiting
• Worsened pain when moving, coughing, or sneezing
• Postdrome (following the headache). Symptoms may include exhaustion, weakness, and confusion after a migraine. This can last up to a day.

Migraines and the Americans with Disabilities Act

The ADA does not contain a definitive list of medical conditions that constitute disabilities. Instead, the ADA defines a person with a disability as someone who (1) has a physical or mental impairment that substantially limits one or more "major life activities," (2) has a record of such an impairment, or (3) is regarded as having such an impairment. For more information about how to determine whether a person has a disability under the ADA, see How to Determine Whether a Person Has a Disability under the Americans with Disabilities Act Amendments Act (ADAAA).

Accommodating Employees with Migraines

People with migraines may develop some of the limitations discussed below, but seldom develop all of them. Also, the degree of limitation will vary among individuals. Be aware that not all people with migraines will need accommodations to perform their jobs and many others may only need a few accommodations. The following is only a sample of the possibilities available. Numerous other accommodation solutions may exist.

Questions to Consider:

1. What limitations is the employee experiencing?
2. How do these limitations affect the employee and the employee’s job performance?
3. What specific job tasks are problematic as a result of these limitations?
4. What accommodations are available to reduce or eliminate these problems? Are all possible resources being used to determine possible accommodations?
5. Once accommodations are in place, would it be useful to meet with the employee to evaluate the effectiveness of the accommodations and to determine whether additional accommodations are needed?

6. Do supervisory personnel and employees need training?

**Accommodation Ideas:**

**Limitations**

**Headache**

- **Products**
  - Air Cleaners & Purifiers
  - Alternative Lighting
  - Anti-Glare Filters for Fluorescent Lights
  - Cubicle Doors, Shields, and Shades
  - Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
  - Fluorescent Light Tube Covers
  - Full Spectrum or Natural Lighting Products
  - LED Light Filters
  - LED Lighting
  - Lighting Gel Filters
  - Modified Lighting
  - Non-Fluorescent Lighting
  - Noise Abatement
  - Noise Canceling Earbuds
  - Noise Canceling Headsets
  - Masks – General/Chemical/Allergen
  - Personal Air Cleaner (Neckworn)
  - Personal Visors
  - Sound Absorption and Sound Proof Panels
  - Task Lighting

- **Strategies**
  - Flexible Schedule
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Telework, Work from Home, Working Remotely

Noise Sensitivity
- Alerting Devices
- Communicate Another Way
- Communication Access Technologies
- Fans
- Hearing Protection
- Noise Abatement
- Noise Canceling Earbuds
- Noise Canceling Headsets
- Real-time and Off-line Captioning Services
- Sound Absorption and Sound Proof Panels
- Worksite Redesign / Modified Workspace

Pain
- Accessories for Scooters
- Adjustable Workstations for Industrial Settings
- Adjustable Workstations for Office Settings
- Aide/Assistant/Attendant
- All-Terrain Scooters
- Alternative Input Devices
- Alternative Keyboards

- Counseling/Therapy
- Flexible Schedule
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- On-site Mentoring
- Service Animal
- Simulated Skylights and Windows
- Supervisory Methods
- Support Animal
- Support Person
- Task Rotation
- Telework, Work from Home, Working Remotely
- Uninterrupted Work Time
Situations and Solutions:

The following situations and solutions are real-life examples of accommodations that were made by JAN customers. Because accommodations are made on a case-by-case basis, these examples may not be effective for every workplace but give you an idea about the types of accommodations that are possible.

An employee who works in a cubicle setting was experiencing migraine headaches that were triggered by the noise level; she was located in a high traffic area by the copy machine.
The employer accommodated this employee by moving her to an area with less traffic and providing an environmental sound machine.

An accountant had a migraine headache about twice a week, which prevented him from coming to work.
As an accommodation, the employer allowed this employee to work from home when he had a migraine headache. If his migraine was too severe to work from home, the employee was allowed to use comp time.

A computer programmer experienced migraines that were triggered by the noise level in his cubicle and the overhead fluorescent lighting.
As an accommodation, his employer provided him with a noise canceling headset, disabled the fluorescent light above his cubicle, and provided natural task lighting.

A journalist had difficulty recovering from shingles.
She was experiencing chronic migraines and depression from six weeks of shingles, which manifested around her right eye. Her employer granted her extended leave to work on her recovery.

A police officer experienced migraines that were triggered by fragrances.
The employer allowed the employee to work a modified schedule and assigned them to low volume areas where it would be less likely that the individual would come into contact with people wearing fragrances.

An assembly line worker’s migraines were triggered by various fragrances.
The employees around him often wore overwhelming perfumes that caused him to have a migraine. As an accommodation, the employer asked other employees to voluntarily refrain from wearing fragrances. The employee was also moved to a part of the assembly line where the fragrances were not as strong.

A human resource representative had migraines several times a month, which prevented her from working.
As an accommodation, the employer provided unpaid flexible leave after all of her paid leave was exhausted.
Products

There are numerous products that can be used to accommodate people with limitations. JAN's Searchable Online Accommodation Resource at https://AskJAN.org/soar is designed to let users explore various accommodation options. Many product vendor lists are accessible through this system; however, JAN provides these lists and many more that are not available on the Web site upon request. Contact JAN directly if you have specific accommodation situations, are looking for products, need vendor information, or are seeking a referral.
